This report further highlights the development of dynamic planner by incorporating Monte Carlo simulation techniques into situations with uncertainties. 1. 2 Outline of Report This project report is organized as follows: Chapter 2 presents a literature survey on planning and scheduling techniques for possible technology transfer into telerobotic applications. Chapter 3 presents the development of a conceptual model for planning in a telerobotic system. The concept presented is both generic and open-ended for understanding knowledge requirement in modeling teleoperation. Chapter 4 presents a task planning technique for a telerobotic environment. The methodology lies primarily on task consideration and resource needs in planning a multi-agent system. Chapter 5 presents a model for scheduling resources in a telerobotic system. A heuristic algorithm that employs results from the planning is discussed. Chapter 6 presents some sample applications in aircraft turnaround functions and simple block-world assembly problems respectively. Chapter...
