ADVANCES IN INTERNATIONAL PSYCHOLOGY

Kassel University Press Apr 2013, 2013. Taschenbuch. Book Condition: Neu. 238x169x25 mm. Neuware - This book is an effort to bring together scholars from several countries report on their research on topics of common interest in psychology. The contributions from Eastern Europe represent new developments in that direction as formerly the topical interests followed largely Soviet psychology. The chapters also discuss the interests in international psychology. That seems to be a hopeful development as the chapters reflect both theoretical concerns, but also practical information useful to the well-being and integration of society. We hope the book is useful to students and researchers in psychology. The chapters are divided into three sections. The first section includes chapters on useful methodological approaches and research on personal dispositions. Since cross-cultural and crossnational psychology is particularly complex it is essential that results are framed by established reliability and validity. In particular the section reports on international research approaches and dispositions starting with a chapter on critical thinking in cross-cultural and cultural psychology. This is followed with data based papers on prejudice, the role of personality in electoral choices, practical advice on how to develop cumulative attitude scales, a social-psychological analysis of goal setting in the effective transmission of health information and related to personal dispositions and motivation. The section concludes with a model for pre-testing self-completion surveys and qualitative interviews aimed at improving psychometric validity. Section 2 covers issues of socialization and well-being. This section...
