All segments of healthcare rely on data provided by insurance companies, consultants, research firms, and the federal government to help them make a host of decisions regarding the delivery of medical services. But while these health professionals rely on data, do they really make the best use of the information Not if they fail to understand whether the assumptions behind the formulas generating the numbers make sense. Not if they dont understand that the world of healthcare is flooded with inaccurate, misleading, and even dangerous statistics. Without jargon or mathematical formulas, nationally renowned healthcare expert and author, Jeff Bauer, presents a clear verbal and visual explanation of what statistics really do. He provides a practical discussion of scientific methods and data to show why statistics should never be allowed to compensate for bad science or bad data. With the tools he supplies, you will learn how to dismantle statistical evidence that goes against common sense.
